Boise, ID 83704

From Anita's University

Anita Goodesign is thinking inside the hoop with the newest class in our university line up, 501: In the Hoop! In this class you will be learning all about our innovative in the hoop techniques. As the name suggests, all of the projects are made easily in your hoop and create unique, fun, and useful projects.

We'll cover a lot of different in the hoop projects like personalized tags, beautiful sun catchers, and lace jewelry bowls. You'll see how to make handy luggage tags, cardholders, keychain bags...and sew much more!

You'll receive hands-on learning by one of our amazing educators. You'll see how to incorporate your machine to really take your projects to the next level. For attending, you'll take home a 3-ring binder filled with tons of information, detailed tutorials, and our exclusive tips & tricks. All of this education will be supported by beautiful designs on your USB sticks so that you can create these projects anytime you'd like!

Make sure you're in the loop by signing up for 501: In the Hoop now!
